## ONLINE EVIDENCE TOOL

### Product Overview

WebCase® is a tool designed by retired law enforcement investigators for to assist investigators in the collection of information from the Internet in a legally defensible and reportable manner.

WebCase® was designed specifically to assist the Internet investigator overcome several common investigative problems.

These problems include:

- The amount of training time required to make an investigator competent and confident enough to investigate crimes occurring online.
- The lack of tools specifically designed for online investigations.
- Proper evidence handling procedures for Internet based evidence.
- Secure storage of Internet based evidence.
- Undercover identity management.
- Internet based suspect management.
- Usable and understandable reporting.

### Product Use

The WebCase® user interface is intended to assist the online investigator record and store online investigations. WebCase® provides the investigator with an easy to use format with an initial case wizard to assist the investigator add required data.

The case wizard walks the investigator, new to WebCase®, through the required initial information needed to properly identify a case. The wizard allows for the addition of agency/company specific information and the addition of an agency or company logo for the reporting application. The investigator utilizes the evidence collection console to record and manage online investigative activity. The saved data is Hashed and stored in a secured environment within the tool. Reports based on the evidence collected can then be published to CD/DVD for distribution.
